## **Human Skull Discovered**

(Homosassa) A work crew with one of the local utilities made a startling discovery early Tuesday afternoon when one man found what appears to be a human skull among yard debris located at the intersection of W. Fling Lane and S. Knightswood Point. The find was reported to the Citrus County Sheriff's Office.

Detectives responded to the wooded area off of S. Suncoast Blvd., along with crime scene technicians who thoroughly processed the scene. No other bones were found.

The skull was turned over to the Leesburg medical examiner's office for further evaluation. Detectives are hoping to possibly identify the person whose skull it is, and if not, perhaps gain insight into the gender and age of the person.

Beyond that, detectives are expecting to seek out the services of a forensic anthropologist to help them possibly identify the remains.

It's unknown at this time if any foul play was involved in the person's death.
