CSTs Back on Scene

(Crystal River) Citrus County Sheriff's Office crime scene technicians were back out on W. Fort Island Trail today to resume their processing of the site where skeletal remains were discovered yesterday afternoon. They're expected to be there for much of Tuesday.

The bones have since been transported to the medical examiner's office in Leesburg for further evaluation.

Detectives are looking at missing persons reported in Citrus County to see if anything links any of them to the skeletal remains found Monday. They also notified surrounding counties of the find to see if they have unrecovered missing persons who may have local ties to this area.

The agency's investigation is continuing.

Anyone who may have information about the possible identity of the person whose remains were found is asked to call 911 or 352-726-1121.
